Hiring Team
[Company Name]

Dear [Hiring Manager's name / Hiring Team],

I am applying for the position of [Job Title] at [Company Name]. I combine creative direction, generative AI and post-production to produce commercial content for global brands, and I would welcome the chance to bring that combination to your team.

Since August 2024 I have worked as an AI Specialist at Hogarth. I build image, video and audio pipelines that use tools such as Kling, ComfyUI, Luma and ElevenLabs, and I finish the output in Adobe Premiere, Photoshop and Audition to broadcast-level standard. Recent work includes a virtual production campaign with 35 social assets for Heineken, more than 40 assets for Iberdrola, TVCs and digital assets for Coca-Cola, Fanta and Schweppes, and final video edits with multiple frames, video and audio for Colgate-Palmolive.

Alongside agency work, I have freelanced since 2023. I created three TVC animations for Osborne, produced more than 60 educational videos for primary schools for Anaya, and led AI direction and social media asset creation for Uncommonsense, following each client's editorial guidelines. I also started teaching this year as Professor of Artificial Intelligence for Video Production on the master's programme at LABASD, La Barcelona School of Design.

What I would bring to [Company Name] is the ability to take a concept from first idea to finished delivery: I work with creatives, retouchers, 3D artists and filmmakers, and I know how to make AI tools fit into a real production schedule and brand brief. I am a native Spanish and Italian speaker, with advanced English.

Thank you for your time. I would be glad to show you my portfolio at nicolo-lombardi.com and talk through how I could contribute to [Company Name].

Kind regards,

Nicolò Lombardi
