APPLICATION — [JOB TITLE]

October 2026

Dear [Hiring Manager's name / Hiring Team],

I'm a generative AI specialist and creative art director with three years of freelance work behind me and more than two years at Hogarth. I work where art direction, AI tools and post-production meet, and I'd like to bring that to [Company Name].

At Hogarth I deliver commercial and social content for global brands. For Heineken I produced a virtual production campaign with 35 social assets. For Iberdrola I delivered more than 40 assets. For The Coca-Cola Company I made TVCs and digital assets for Coca-Cola, Fanta and Schweppes. For Soap & Glory I delivered 20 assets, and I'm currently delivering final video edits with multiple frames, video and audio for Colgate-Palmolive.

I also work directly with clients. For Osborne I created three TVC animations about the brand's story. For Anaya I produced more than 60 educational videos for primary schools. For Uncommonsense I led the AI direction and creation of social media assets, following their editorial brand guidelines. This year I also started teaching as Professor of Artificial Intelligence for Video Production on the master's programme at LABASD, La Barcelona School of Design.

The tools change every few months, and I know which ones hold up in a real production schedule and which don't. I'd like to bring that judgement, and the craft behind it, to your team. My portfolio is at nicolo-lombardi.com, and I'd welcome the chance to talk.

Kind regards,

Nicolò Lombardi

WHERE I FIT

Craft

Commercial and branded content for Coca-Cola, Heineken, Iberdrola and Colgate-Palmolive.

Generative stack

Kling, Runway, Luma, ElevenLabs, Seedance, Flux, Magnific and Google Veo in production use.

Brand consistency

AI direction and social assets built on editorial guidelines, for Uncommonsense.

Teach

Professor of AI for Video Production, LABASD, 2026.

Freelance

Since 2023, with clients including Osborne, Anaya and Uncommonsense.
