APPLICATION — CREATIVE & AI PRODUCTION

October 2026

Dear Hiring Team,

I'm a generative AI specialist and creative art director with three years of freelance work and more than two years at Hogarth. I work where art direction, AI tools and post-production meet: I make the content myself, and I build the workflows that let a team make more of it.

On the making side, I deliver commercial and social content for global brands. For Heineken I produced a virtual production campaign with 35 social assets, for Iberdrola more than 40 assets, and for The Coca-Cola Company TVCs and digital assets for Coca-Cola, Fanta and Schweppes. For Soap & Glory I delivered 20 assets, and I'm currently delivering final video edits with multiple frames, video and audio for Colgate-Palmolive.

On the freelance side, I have worked directly with clients. For Osborne I created three TVC animations about the brand's story. For Anaya I produced more than 60 educational videos for primary schools. For Uncommonsense I led AI direction and social media asset creation, following their editorial brand guidelines. This year I also started teaching Artificial Intelligence for Video Production on the master's programme at LABASD, La Barcelona School of Design.

The tools change every few months, and I know which ones hold up in a real production schedule. I'd like to bring that judgement, and the craft behind it, to your team. My portfolio is at nicolo-lombardi.com, and I'd welcome a conversation.

Kind regards,

Nicolò Lombardi

WHERE I FIT

Craft

Commercial and branded content for Coca-Cola, Heineken, Iberdrola and Colgate-Palmolive.

Generative stack

Kling, Runway, Luma, ElevenLabs, Seedance, Flux, Magnific and Google Veo in production use.

Brand consistency

AI direction and social assets built on editorial guidelines, for Uncommonsense.

Teach

Professor of AI for Video Production, LABASD, 2026.

Freelance

Since 2023, with clients including Osborne, Anaya and Uncommonsense.
